

Annex 5

Questions

1. Is it the applicant's intention to operate any licensable activities at the same time as the Sexual Entertainment Licence (SEV) activities? If so, please specify what and the intended hours of operation.
2. Would the SEV activities involve any form of music?
3. Would the SEV activities involve any amplified speech?
4. Where in the premises would such SEV activities take place? Please specify in particular whether they would take place on the ground floor, in the basement, or both.
5. Would the SEV activities be likely to generate noise from shouting, raised voices or other boisterous behaviour?
6. What noise controls, including management controls, would be in place to control noise from the SEV activities.

Answers

1. Licensable activities will continue as usual, during the same hours as before as per our premises license. This will therefore be happening in conjunction with the sexual entertainment. Hours of business will be 9pm - 2am, selling alcohol until 1.30am as usual.
2. The SEV will include background music, but this will be significantly lower than current levels during those hours.
3. The SEV will not involve amplified speech.
4. SEV activities will take place in the basement under constant supervision of SIA registered security staff.
5. There will be no noise generated by patrons during performances. Similar to the music levels, noise from customers will be significantly reduced from current levels.
6. The current noise controls will remain in place. On top of this, we will be employing extra security staff for these activities, so we will have an even greater level of management controls than those we already enjoy.
