

Corporate Financial Monitoring

Report of the Finance Portfolio Holder

Recommended:

That the financial position for each Portfolio and the key revenue areas contained in the Annex to the report be noted.

SUMMARY:

- This report reviews the Council's revenue spending for the first four months of the 2021/22 financial year.
- It also examines the main differences between the original estimate for 2021/22 and actual spend to 31st July 2021 and provides explanations for significant variances.
- Overall, net expenditure to 31st July 2021 was £460,000 lower than budgeted at this stage of the year. This favourable variance comprises additional income and savings of £434,000 due to service related expenditure and £26,000 more income from the Council's investing and borrowing activities.

1 Introduction

- 1.1 As part of responsible financial stewardship, it is recommended that the financial performance of the Council should be reviewed regularly.
- 1.2 Revenue budget monitoring is carried out every month for all Services and presented to Cabinet regularly throughout the year.
- 1.3 This report examines the income and expenditure of each portfolio over the first four months of the year. The Annex shows the financial summaries of each portfolio to 31st July 2021 together with an explanation of any significant variances.
- 1.4 Several key areas of income and expenditure, not all apparent within individual portfolios have also been analysed and are also shown in the Annex.

2 Background

Profiling of Income and Expenditure

- 2.1 Not all income and expenditure is incurred equally over the year. For example, some costs (e.g. lease costs) are allocated at the end of the year, and others are stepped throughout the year (e.g. rental income is invoiced quarterly in advance). The manner that income or expenditure is received or incurred over the course of the year is referred to as its profile.

- 2.2 In order to make the analysis more relevant, the actual income and expenditure to 31st July is being compared against its profiled budget position at this time.
- 2.3 Profiled budgets include an estimate for the impact of Covid-19 on income and expenditure.

Analysis of income and expenditure

- 2.4 The Annex shows, by portfolio, an analysis of original budget, profiled budget to date, actual expenditure to date and the variance between profiled budget and actual income / expenditure.
- 2.5 The Annex also shows an analysis of key areas of income and expenditure within the budget that are traditionally subject to variations in the year.

3 Impact of Covid-19

- 3.1 The budget for 2021/22 includes a pressure due to the impact of Covid-19 on services of £2.544M, which reduces to a net pressure of £1.050M after taking account of support from central government in the form of Sales, Fees & Charges compensation and other support grants.
- 3.2 The budgets and profiled budgets in this report include this pressure, and all variances detailed in the following section are after taking this into account.

4 Analysis of Financial Performance

4.1 Leader's Portfolio

The Leader's portfolio shows net expenditure to the end of July of £580,000 against a profiled budget of £585,000. This represents a favourable variance of £5,000 to date.

4.2 Deputy Leader & Planning Portfolio

The Deputy Leader & Planning portfolio shows net expenditure of £489,000 compared with a profiled net expenditure estimate of £511,000 – a favourable variance of £22,000.

Income from car parking is £29,000 lower than budgeted. This is due to free parking remaining in place in the Borough until 12th April, and COVID restrictions still being in place once parking charges resumed. This is partially offset by lower costs of collection of parking income and other supplies & services.

Lower than budgeted income from planning applications and additional staffing costs due to workload and resource issues in building control are partially offset by higher than budgeted income from building control fees and small savings due to reduced officer mileage.

4.3 Community & Leisure Portfolio

The Community & Leisure portfolio shows net expenditure to the end of July of £788,000 against a profiled estimate of £865,000. This is a favourable variance of £77,000.

This is due to savings on employee costs of £32,000 and lower than budgeted spend on premises costs and supplies & services.

4.4 Corporate Portfolio

The Corporate portfolio shows net expenditure to the end of July of £1.227M against a profiled budget of £1.352M. This represents a favourable variance of £125,000 to date.

Net land charges income is £37,000 higher than budgeted, most likely due to the temporary extension to the nil band for stamp duty that was in place until 30th June 2021.

There are also some savings from training and employee costs, and unbudgeted government grants within Elections and Register of Electors.

4.5 Economic Development & Tourism Portfolio

The Economic Development & Tourism portfolio shows net expenditure of £139,000 against a profiled estimate of £150,000. This represents a favourable variance of £11,000.

This is due to grant payments being lower than estimated at this point in the year.

4.6 Environmental Portfolio

The Environmental portfolio shows net expenditure of £991,000 against a profiled estimate to the end of July of £1.153M – a favourable variance of £162,000.

Employee costs across the service as a whole are £95,000 below budget and there is additional income from glass and dry mixed recycling, bulky waste, bins and shopping trolleys.

4.7 Finance Portfolio

The Finance portfolio has generated net income of £3.352M against a profiled estimate of £3.331M to the end of July. This is a favourable variance of £21,000.

This is due mainly to lower than expected staffing costs to date and slightly higher than estimated income from corporate properties partially offset by additional professional fees.

4.8 Housing & Environmental Health Portfolio

4.9 The Housing & Environmental Health portfolio shows expenditure of £712,000 compared with the profiled estimate of £723,000. This is a favourable variance of £11,000.

This is due to lower than budgeted employee and mileage costs, partly offset by an increase in bed & breakfast costs.

4.10 Key areas of income and expenditure

The Annex also shows an analysis of significant items in the Council's budget. These can be spread across several Services or cost centres so may be included in more than one portfolio.

While not necessarily under the direct control of one budget manager it is important that these items are reviewed regularly in total as they provide a good indication of the overall variances within the budget.

4.11 Investment Funds and borrowing costs

Net investment income to 31st July 2021 was £108,000 compared with a profiled estimate of £82,000 – this represents a favourable variance of £26,000.

5 Risk Management

5.1 This report is for information purposes so the Council's Risk Management approach does not need to be applied.

6 Resource Implications

6.1 A favourable variance of £460,000 in the first four months of the year has been identified in this report. There is a mixture of adverse and favourable variances across the portfolios and these will continue to be monitored and reviewed as part of the Budget process.

7 Equality Issues

7.1 This report is for information purposes, so the Council's EQIA process does not need to be applied.

8 Other Issues

8.1 There are no other issues to consider.

9 Conclusion and reasons for recommendation

9.1 Overall, net expenditure is £460,000 lower than forecast at 31st July. There are a number of areas with large variances between the profiled budget and the actual income / expenditure to date.

- 9.2 The report does not make any recommendations for changes to budgets at this stage in the year and therefore the recommendation is that the current budget position be noted.
