IMPORTANT
Health, Safety & Environmental Information
Refer to the Safety and Health Plan for hazards and risks associated with this type of work.
1. The above documents and drawings show hazards that have become apparent to the designer at the time of issue and is not an exhaustive list. It should be noted that hazards not yet identified remain to be documented or residual hazards and information that may be useful to those contracting or maintaining the works, including those that may be identified during the course of the project.
2. These drawings should be read in accordance with proposed and existing utilities coordinated through the Project Supervisor Design Process.
3. All design work (including permanent, temporary and specialist works) to be carried out by competent contractors working to an approved method statement.

NOTE:
The architect's drawings and specifications are indicative of design intent only and define the performance criteria. The architect's drawings and specifications do not constitute a contract. The architect's drawings and specifications are subject to change and completion of the design in accordance with the above and other Contract Documents, taking into account any additional criteria which, with the specialist knowledge, he believes are relevant.
The envelope specialist subcontractors are responsible for coordination and completion of all work in accordance with the drawings and specifications and with requirements of all manufacturer warranty conditions.
