

Dear Sir,

I see there has been no application for a change of use or planning application in relation to the building on the sight!

This would be necessary if the building were to change use and become a licences premises open until late at night.

At the moment it is a fishing tackle shop and cafe.

For a fishing sight it needs tranquil peace and quiet.

One creeps along the lake or rivers edge to fish not charm them out of the water with thumping music and flashing lights.!!

As it is the shop is fine and suitable for purpose. Changing this would make the fishing redundant. !

I live within several hundred yards of the sight. I love it here because I value the quiet natural countryside, the hedgerows and native birds and animals that reside in them.

This is a rural farming area with many horses and riders using these lanes and roads that are already in danger from traffic.

I strongly object to this application on the grounds of :-

1, noise from the music especially at night as it carries over the lakes and fields. We are already disturbed by the clay shoots in the area which sensibly were not allowed to extend their hours.

2.

Danger on the roads in this equestrian area. Many hose and rider use the road and adjacent lanes.

3.

Unsuitable sight.

This is a quiet rural fishing business suitable for the area. It is not suitable to have Alchol and blearing music all day and night.

4

The entrance is on a dangerous corner. Alchol and the single lane tracks of the ares do not mix.

Please turn down this application and let the residents of this area live their lives in peace as we all deserve.

With regards
Kirsty Trentham
