

CATEGORY AND DEFINITION

Trees unsuitable for retention	
Category U	Trees with a canopy diameter less than 10m and a height less than 10m, or trees with a canopy diameter less than 10m and a height less than 10m, or trees with a canopy diameter less than 10m and a height less than 10m.
Trees to be considered for retention	
Category A	Trees of high quality with an estimated remaining life expectancy of at least 40 years.
Category B	Trees of moderate quality with an estimated remaining life expectancy of at least 20 years.
Category C	Trees of low quality with an estimated remaining life expectancy of at least 10 years, or young trees with a diameter less than 100mm.

NOTE:
Hayden's Arboricultural Consultants were provided with a Topographical Survey but these do not always show the positions of all the trees/features on site. The locations of any additional features have been fixed using GPS. As such the position of the trees/landscape features should not be taken as exact but gives a fair distribution of their locations on site.

LEGEND
